

FROZEN FOODS & VEGETABLES

Formers that enhance
production efficiency:

- Tubes and funnels constructed with textured materials to eliminate film and belt slippage
- Inner tube options act as a condensation barrier keeping the outer tube clean and dry
- Drip pans positioned at the tube inlet to channel moisture away from the former and machine preserving the packaging area
- ▼ Ultralyte material reduces the weight by up to 50%

BAG TYPES:

FLAT BOTTOM
GUSSETED
PILLOW
